AMIT YADAV

Full Stack Developer

ydvamit.me@gmail.com +917724949303 Itarsi, MP Linkedin Portfolio

PROFESSIONAL SUMMARY

Dedicated Full Stack Developer skilled in FastAPI, SQL, HTML, CSS, and JavaScript. Experienced in building responsive web applications, developing REST APIs, and creating scalable backend solutions. Strong problem-solving, teamwork, and adaptability with a commitment to delivering secure, efficient, and high-quality software.

PROFESSIONAL EXPERIENCE

Cyber Security Intern 06/25 – 08/25
INTERNSELITE Remote

Web Development Intern 03/24 – 07/24
InternPe Remote

EDUCATION

Software Development 03/2026 – 07/2026
Masai School Bengaluru (Remote)

B.Tech 11/2022 – 04/2026
Rajiv Gandhi Proudyogiki Vishwavidyalaya (RGPV) Bhopal

SKILLS

Technical Skills
- Languages: Python, JavaScript
- Database: SQL, Supabase
- Backend: FastAPI, REST APIs, JWT Authentication, CRUD Operations
- Frontend: HTML, CSS, Tailwind CSS
- Tools: Git and GitHub
- Cybersecurity: Ethical Hacking

Soft Skills
- Problem-solving
- Adaptability

PROJECT

Zomato Notes
- Developed a full-stack internal notes and knowledge base application for on-call support engineers using HTML, CSS, JavaScript, FastAPI, and Supabase.
- Built REST APIs using FastAPI to create, update, retrieve, and delete (CRUD) incident notes.
- Structured and maintained the database to securely organize notes, tags, and related information for efficient retrieval.
- Enabled fast note discovery through keyword search and tag-based filtering during live incidents.
- Added lightweight AI-assisted note classification and retrieval to improve productivity and reduce time spent searching for information.

MY_LLM
- Programmed an AI-driven conversational platform for interactive chat and automated content creation using HTML, CSS, JavaScript, FastAPI, and SQL.
- Established account security through user registration, login verification, and personalized access permissions.
- Enabled context-preserving dialogue across multiple exchanges to support continuous interactions with the AI model.
- Integrated prompt-based image synthesis and cross-device chat history persistence for convenient access to previous sessions.
- Architected server-side services for model inference requests, profile administration, dialogue storage, and generated media delivery through a responsive interface.
